## PROFESSIONAL SUMMARY

Backend Java Developer with 5+ years of experience in designing and delivering scalable microservices and REST APIs in telecom and banking domains. Strong experience with Spring Boot, Kafka, event-driven systems, and TMF-compliant APIs. Proven ability to deliver high-impact backend solutions, mentor junior developers, and support production systems. Seeking a backend-focused role to build reliable, distributed systems in a product-driven environment.

## TECHNICAL SKILLS

- **Programming Languages:** Java 17/21
- **Design & Fundamentals:** OOP, Design Patterns
- **Messaging & Streaming:** Apache Kafka
- **Architectures:** Microservices, Event Driven Architecture, REST-based Systems
- **Dev Tools:** Git, GitHub, Bitbucket, Maven, Postman
- **IDE:** IntelliJ IDEA, Eclipse, VS Code
- **Frameworks & Libraries:** Spring Boot, Hibernate, JPA
- **Security & API:** JWT, OAuth, Swagger / OpenAPI
- **Database:** MySQL, Oracle, PostgreSQL, Cassandra
- **DevOps & Platforms:** Docker, Kubernetes, Jenkins, OpenShift
- **Testing:** JUnit, Mockito
- **Other:** RESTful Web Services, Cursor AI, Tabnine, Prompt Engineering

## PROFESSIONAL EXPERIENCE

### Amdocs, Pune — Software Developer

Aug 2022 – Present

- Delivered end-to-end LOB provisioning for JCOM across **4+ product lines (TV, phone, fiber/net, au Hikari)**, coordinating install and billing with **automated failure recovery**.
- Shipped **3 TMF APIs** for Vivo and cut average response time **from 800 ms to 320 ms**.
- Built a high-throughput Streaming Conversion application that migrated live BANs for T-Mobile in **batches of 50K+ accounts** inside a **hard 2-hour cutover window**.
- Strengthened AT&T Sky Fallout handling **200+ failure ticket categories** so support can retry or fix at scale, added automated workflows to resolve tickets without manual intervention.
- Built event-driven integrations (**REST + Kafka**) between order and workflow services and partners, with idempotent consumers and reliable async handoff.
- Supported the full SDLC—requirements, development, unit testing, and defect fixes—to keep releases on track.
- Mentored new joiners through first deliveries so they contributed faster.

### Infosys, Pune — Senior System Engineer

Nov 2020 – Jul 2022

- Built Java/Spring Boot services for a **UK banking reconciliation app**, matching financial data across systems to surface breaks faster for ops.
- Integrated Elasticsearch for **search and analytics** so reconciliation and issue lookup stayed fast as data volumes grew.
- Designed and tuned complex Oracle SQL for reconciliation, **cutting query time** and making break reports more reliable.
- Created ELK (Elasticsearch, Logstash, Kibana) **dashboards** so the team could monitor logs and diagnose issues without digging files by hand.
- Built and deployed **internal utilities** on UNIX that helped RDS developers work faster day to day.
- Delivered features in **Agile sprints** with clear ownership from build through unit testing.

## EDUCATION

**BE Computer Science:** 8.92 CGPA (Government College of Engineering and Research, Pune) Aug 2016 – May 2020

## CERTIFICATIONS

- Java Design Patterns by Udemy
- Infosys Certified Spring Boot Developer
- Infosys Certified Spring REST Programmer
- Agentic Development using Cursor
